DEPARTMENT OF STATE
OFFICE OF INTERNATIONAL SCIENTIFIC AFFAIRS

To Pugwash Conference:

As you meet again in Czechoslovakia to explore all possible scientific approaches for means to assist the nations of the world in avoiding a nuclear holocaust, I extend to you the greetings and good wishes of the American people. I hope your deliberations will reflect the earnest concern of all people of good-will that a safeguarded way of preserving the peace be found so that we may devote our full energies and resources ~~to the task~~ to building a better world for all men.

L.B.J.

P.S. I have read the above to David Klein on the phone. He has no problems with it. His draft is designed more as a campaign document designed to enumerate and defend what we have done. NYK
